

Dr. Urartu Safak Ozgur Seker has received his Ph.D. degree from Molecular Biology Genetics and Biotechnology programme at Istanbul Technical University in 2009. Between 2004 and 2008 he worked as a Research Assistant at Materials Science and Engineering Department of University of Washington. Afterwards, he worked as a research associate at Singapore Nanyang Technological University, Electrical and Electronics Engineering and Applied Physics departments. Then, he worked as a postdoctoral researcher at MIT Biological Engineering Department and MIT Synthetic Biology Center between 2011 and 2014. In 2014, he joined Bilkent University UNAM as an Assistant Professor. His research interests spans a wide field including synthetic biology enabled cellular programming for biosensing and regenerative medicine, synthetic biogenesis of bioinspired biomaterials and targeted drug delivery and controlled release platforms.
